DIRECTORS' REPORT FOR THE YEAR/PERIOD ENDED 30 JUNE 2009

Review of Operations

Income

The distributions in cents per unit for each of the Funds for the year/period ended 30 June 2009 and 30 June 2008 are shown in Note 3 to the financial statements.

Exit Prices

The exit price is the price at which unitholders realise an entitlement in a Fund and is calculated by deducting a predetermined cost of selling (commonly known as the "sell spread"), if applicable, from the net asset value per unit ("NAV unit price") of a Fund. NAV unit price is calculated by taking the total fair value of all of a Fund's assets on a particular day, adjusting for any liabilities and then dividing the net fund value by the total number of units held by unitholders on that day.

The following unit prices represent the ex-distribution exit unit prices as at 30 June 2009 and 30 June 2008.

The Funds are registered managed investment schemes domiciled in Australia and have their principal place of business at Level 29, 52 Martin Place, Sydney, New South Wales, 2000.

Unit Pricing Adjustments Policy

There are a number of factors used to calculate unit prices. The key factors include asset valuations, liabilities, debtors, the number of units on issue and where relevant, transaction costs. When the factors used to calculate the unit price are incorrect an adjustment to the unit price may be required. The Responsible Entity uses a variance of 0.30% (0.05% for a cash investment option) in the unit price before correcting the unit price.

If a unit pricing error is greater than these tolerance levels the Responsible Entity will:

- compensate unitholders' accounts balance if they have transacted on the incorrect unit price or make other adjustments as the Responsible Entity may consider appropriate, or
- where unitholders' accounts are closed we will send them a payment if the amount of the adjustment is more than \$20.

These tolerance levels are consistent with regulatory practice guidelines and industry standards. In some cases we may compensate where the unit pricing error is less than the tolerance levels.

Significant Changes in the State of Affairs

There were no significant changes in the nature of the Funds' activities during the year.

Effective from 3.00pm Friday 24th October 2008, the Colonial First State Income Fund was declared illiquid and the application, withdrawal and switch processes were suspended, until further notice.

This was to ensure withdrawal requests could be responded to in a measured and orderly way in the best interests of unitholders.

For this Fund, the Responsible Entity intends to process withdrawal and switch requests on a quarterly basis (or such other intervals determined from time to time), depending on the level of cash available within the Fund to meet those requests at that time. The cash available in the Fund will depend on asset sales and the repayment of maturing mortgages in the underlying Fund this Fund invests in. Any payment made in respect of a withdrawal or switch request will be calculated at a unit price determined at the time the payment is to be made.

Please refer to Note 11 for details on the quarterly withdrawal offers made during the year ended 30 June 2009.

COLONIAL FIRST STATE - FIRSTCHOICE INVESTMENTS

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR/PERIOD ENDED 30 JUNE 2009

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of Preparation

The financial report is a general purpose financial report, which has been prepared in accordance with the Funds' Constitutions and the requirements of the Corporations Act 2001, which includes Accounting Standards. Other mandatory professional reporting requirements have also been complied with.

The financial report is prepared on the basis of fair value measurement of assets and liabilities except where otherwise stated.

The Balance Sheets are presented on a liquidity basis. Assets and liabilities are presented in decreasing order of liquidity and are not distinguished between current and non-current. All balances are expected to be settled within twelve months, except for financial assets held for trading, loans and net assets attributable to unitholders. The amounts expected to be recovered or settled after more than twelve months in relation to these balances cannot be reliably determined, except as otherwise stated.

The financial report was authorised for issue by the Directors of the Responsible Entity on 28 August 2009.

Both the functional and presentation currency of the Funds are Australian dollars.

(b) Statement of Compliance

The financial report complies with Australian Accounting Standards, which include Australian equivalents to International Financial Reporting Standards ('AIFRS'). Compliance with AIFRS ensures that the financial report, comprising the financial statements and notes thereto, complies with International Financial Reporting Standards ('IFRS').

(c) Investments in Financial Assets and Liabilities Held for Trading

Classification

The Funds' investments are classified as held for trading and initially recognised at fair value not including transaction costs, which are expensed in the income statement.

Recognition/Derecognition

The Funds recognise financial assets and financial liabilities on the date it becomes party to the contractual agreement (trade date) and recognises changes in fair value of the financial assets or financial liabilities from this date.

The derecognition of a financial instrument takes place when the Funds no longer control the contractual rights that comprise the financial instrument, which is normally the case when the instrument is sold, or all the cash flows attributable to the instrument are passed through to an independent third party.

Measurement

After initial recognition, the financial assets held for trading are revalued to fair value at each reporting date.

For financial assets held for trading that are actively traded in organised financial markets, fair value is determined by reference to Exchange quoted market bid prices at the close of business on the balance date.

COLONIAL FIRST STATE - FIRSTCHOICE INVESTMENTS

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR/PERIOD ENDED 30 JUNE 2009

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(c) Investments in Financial Assets and Liabilities Held for Trading (continued)

Measurement (continued)

For financial liabilities from the short sales of financial instruments that are actively traded in organised financial markets, fair value is determined by reference to Exchange quoted market ask prices at the close of business on the Balance Sheet date.

For investments where there is no quoted market price, fair value is determined by reference to the current market value of another instrument which is substantively the same or is calculated based on the expected cash flows of the underlying net asset base of the investment. The fair value of units in unlisted Managed Investment Schemes is determined by reference to published bid prices at the close of business on the Balance Sheet date being the redemption price as established by the underlying Fund's Responsible Entity.

Gains or losses on investments held for trading are recognised in the Income Statements. Investments of the Funds which are considered to be held for trading are equity securities, fixed interest and money market securities, derivatives and investments in Managed Investment Schemes.

(d) Investment Income

Income is recognised to the extent that it is probable that the economic benefits will flow to the Funds and the income can be reliably measured. The following specific recognition criteria must also be met before income is recognised:

Distribution income

Income is recognised when the right to receive the payment is established.

Interest income

Income is recognised as the interest accrues (using the effective interest rate method, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument) to the net carrying amount of the financial asset.

Changes in fair value of financial assets held for trading

Gains or losses on investments held for trading are calculated as the difference between the fair value at sale, or at year end, and the fair value at the previous valuation point. This includes both realised and unrealised gains and losses.

(e) Cash and cash equivalents

Cash and cash equivalents in the Balance Sheets comprise cash at bank, deposits at call with futures clearing house and short-term deposits with an original maturity of three months or less.

For the purposes of the Cash Flow Statements, cash and cash equivalents are as defined above, net of outstanding bank overdrafts.

(f) Trade and Other Receivables

Receivables are recognised and carried at the original invoice amount, less a provision for any uncollectible debts. An estimate for doubtful debts is made when collection of an amount is no longer probable. Bad debts are written off when identified.

Amounts are generally received within 30 days of being recorded as receivables.

COLONIAL FIRST STATE - FIRSTCHOICE INVESTMENTS

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR/PERIOD ENDED 30 JUNE 2009

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(g) Trade and Other Payables

Liabilities for creditors are carried at cost, which is the fair value of the consideration to be paid in the future for goods and services received, whether or not billed to the Funds.

Payables include outstanding settlements on the purchase of financial assets and liabilities held for trading and distributions payable. The carrying period is dictated by market conditions and is generally less than 30 days.

(h) Taxation

Under current legislation, the Funds are not subject to income tax provided the unitholders are presently entitled to the income of the Funds and the Funds fully distribute their taxable income.

(i) Distributions

In accordance with the Funds' Constitutions, the Funds fully distribute their distributable income to unitholders. Distributions are payable at the end of each month, quarter or half-year. Such distributions are determined by reference to the taxable income of the Funds. Distributable income includes capital gains arising from the disposal of financial assets and liabilities held for trading. Unrealised gains and losses on financial assets and liabilities held for trading that are recognised as income are transferred to net assets attributable to unitholders and are not assessable and distributable until realised. Capital losses are not distributed to unitholders but are retained to be offset against any realised capital gains.

(j) Net Assets Attributable to Unitholders

Under AASB 132 "Financial Instruments: Disclosure and Presentation", contractual obligations are regarded as liabilities. As unitholders have the ability to redeem units from the Funds, all net assets attributable to unitholders have been recognised as liabilities of the Funds, rather than as equity. The classification of net assets attributable to unitholders does not alter the underlying economic interest of the unitholders in the net assets and net profit attributable to unitholders of the Funds.

(k) Unit Prices

Unit prices are determined in accordance with the Fund's Constitution and are calculated as the net assets attributable to unitholders, divided by the number of units on issue. Financial assets and liabilities held for trading for unit pricing purposes are valued on a "last sale" price basis.

(l) Terms and Conditions on Units

Each unit issued confers upon the unitholders an equal interest in the Funds, and is of equal value. A unit does not confer any interest in any particular asset or investment of the Funds. Unitholders have various rights under the Constitution and the Corporations Act 2001, including the right to:

- receive income distributions;
- attend and vote at meetings of unitholders;
- participate in the termination and winding up of the Funds; and
- have their units redeemed. However the Responsible Entity may suspend the redemption of units in the circumstances set out in the Constitution or when the Funds are not liquid.

The rights, obligations and restrictions attached to each unit are identical in all respects.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR/PERIOD ENDED 30 JUNE 2009

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(m) Goods and Services Tax (GST)

Income, expenses and assets, with the exception of receivables and payables, are recognised net of the amount of GST to the extent that the GST is recoverable from the taxation authority. Where GST is not recoverable, it is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable.

Receivables and payables are stated inclusive of GST.

Reduced input tax credits (RITC) recoverable by the Funds from the Australian Taxation Office are recognised as receivables in the Balance Sheets.

Cash flows are included in the Cash Flow Statements on a gross basis. The GST component of cash flows, which is recoverable from, or payable to, the taxation authority is classified as operating cash flows.

(n) Expense Recognition

Expenses are recognised in the Income Statements when the Funds have a present obligation (legal or constructive) as a result of a past event that can be reliably measured. Expenses are recognised in the Income Statements if expenditure does not produce future economic benefits that qualify for recognition in the Balance Sheets.

(o) Use of estimates

The Funds make estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates are continually evaluated and based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

For the majority of the Funds' financial instruments, quoted market prices are readily available. However, certain financial instruments, for example, over-the-counter derivatives or unquoted securities are fair valued using valuation techniques. Where valuation techniques (for example, pricing models) are used to determine fair values, they are validated and periodically reviewed by experienced personnel of the Responsible Entity, independent of the area that created them. Models are calibrated by back-testing to actual transactions to ensure that outputs are reliable.

Models use observable data, to the extent practicable. However, areas such as credit risk (both own and counterparty), volatilities and correlations require management to make estimates. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

(p) New Application of Accounting Standards

Certain new accounting standards and interpretations have been published that are not mandatory for 30 June 2009 reporting periods. The impact of these new standards and interpretations is set below:

- AASB 8 "Operating Segments" and AASB 2007-3 "Amendments to Australian Accounting Standards" arising from AASB 8.

AASB 8 and AASB 2007 - 3 are effective for annual reporting periods beginning on or after 1 January 2009. The Funds have not adopted these standards early. Application of these standards will not affect any of the amounts recognised in the financial statements, but may affect the segment disclosures provided in Note 7.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR/PERIOD ENDED 30 JUNE 2009

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(p) New Application of Accounting Standards (continued)

- Revised AASB 101 "Presentation of Financial Statements Revised" and AASB 2007-8 "Amendments to Australian Accounting Standards" arising from AASB 101.

AASB 101 (Revised) is applicable to annual reporting beginning on or after 1 January 2009. The Fund has not adopted this standard early. It requires the presentation of a statement of comprehensive income and makes changes to the statement of changes in equity will not affect any amounts recognised in the financial statements. If a Fund has made a prior period adjustment or has re-classified items in the financial statement, it will need to disclose a third Balance Sheet, this one being at the beginning of the comparative period.

- AASB 132 Financial Instruments: Presentation and AASB 2008-2 Amendments to Australian Accounting Standards - Puttable Financial Instruments and Obligations Arising on Liquidation (Revised AASB 132).

Revised AASB 132 is applicable for reporting periods beginning on or after 1 January 2009. The Funds have not adopted this standard early. Application of this standard will not affect any of the amounts recognised in the financial statements as the Funds are obligated to distribute all of its taxable income in accordance with the Fund's Constitution. Accordingly, there will be no change to classification of unitholders' funds as a liability and therefore no impact on profit or loss and equity.

- AASB 7 Financial Instruments: Disclosure and AASB 2009-2 Amendments to Australian Accounting Standards - Improving Disclosures about Financial Instruments

Revised AASB 7 is applicable for reporting periods beginning on or after 1 January 2009. The Funds have not adopted this standard early. The amendments require fair value measurement disclosures to be classified into a new three-level hierarchy and additional disclosures for items whose fair value is determined by valuation techniques rather than observable market values. The amendments will not affect any of the amounts recognised in the financial statements but may affect certain disclosures.

(q) Comparatives

Comparative figures are, where appropriate, reclassified so as to be comparable with the figures and presentation in the current year.

2. AUDITORS' REMUNERATION

Auditors' remuneration in respect of auditing the financial reports is fully paid by the Responsible Entity.

Other services provided by the auditors are the audit of the compliance plan of the Funds and tax compliance services. The auditors' non-audit remuneration is not paid by the Funds.

- b) Capital Risk Management

The Funds manage their net assets attributable to unitholders as capital, notwithstanding net assets attributable to unitholders are classified as a liability. The amount of net assets attributable to unitholders can change significantly on a daily basis as the Funds are subject to daily applications and redemptions at the discretion of unitholders with the exception of the Colonial First State Income Fund.

The Funds monitor the level of daily applications and redemptions relative to the liquid assets in the Funds. Liquid assets generally include cash and cash equivalents and financial assets held for trading. The investments of the Colonial First State Income Fund in the Colonial First State Pooled Mortgage Fund are currently considered to be illiquid. The cash levels in this Fund are dependant on the repayment of maturing mortgages and principal repayments on mortgages.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR/PERIOD ENDED 30 JUNE 2009

7. SEGMENT INFORMATION

The Funds operate in one business segment, being investment management. The Funds operate from one geographic location being Australia, from where their investing activities are managed.

8. FINANCIAL RISK MANAGEMENT

The Funds' activities expose it to a variety of financial risks: market risk (including price risk and interest rate risk), credit risk and liquidity risk.

The Funds' overall risk management programme focuses on ensuring compliance with the Fund's Product Disclosure Statement and seeks to maximise the returns derived for the level of risk to which the Funds are exposed. Certain Funds use derivative financial instruments to alter certain risk exposures. Financial risk management is carried out by the respective investment management departments (Investment Managers) and regularly monitored by the Compliance Department of the Responsible Entity.

The Funds use different methods to measure different types of risk to which it is exposed. These methods include sensitivity analysis in the case of interest rate, foreign exchange and other price risks and ratings analysis for credit risk.

(a) Market Risk

(i) Price risk

The Funds' financial assets are indirectly exposed to price risk. This arises from investments in unlisted managed investment schemes, which is also managed by the Responsible Entity, for which prices in the future are uncertain. They are classified on the balance sheet at fair value through profit or loss. These investments present a risk of loss of capital.

The Investment Managers mitigate price risk through diversification and a careful selection of securities and other financial instruments within specified limits and guidelines in accordance with the Product Disclosure Statement/Information Memorandum or Constitutions and are regularly monitored by the Compliance Department of the Responsible Entity.

The table in Note 8 (b) summarises the impact of an increase/decrease of the Australian and global indexes on the Funds' net assets attributable to unitholders at 30 June 2009 and 30 June 2008. The analysis is based on the assumptions that the relevant indexes increased or decreased as tabled in Note 8 (b) with all other variables held constant and that the fair value of the Funds' which have indirect exposures to equity securities and derivatives moved according to the historical correlation with the indexes. Funds that invest in various asset classes, such as multi-sector Funds, will have a weighted average movement calculated based on the proportion of their investments in the those classes.

8. FINANCIAL RISK MANAGEMENT (continued)

(a) Market Risk (continued)

(ii) Interest rate risk

The Funds' exposure to interest rate risk is limited to its cash and cash equivalents, which earns a floating rate of interest.

Certain Funds (through their investments in other managed investment schemes) are indirectly investing in interest bearing financial assets and are exposed to the risks associated with the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows.

Certain Funds (through their investments in other managed investment schemes) are also indirectly entering into derivatives financial instruments to mitigate the risk of future interest rate changes in accordance with the risk policies and guidelines of the Investment Managers. These transactions are regularly monitored by the Compliance Department of the Responsible Entity.

The table in Note 8(b) summarises the impact of an increase/decrease of interest rates on the Funds' operating profit and net assets attributable to unitholders through changes in fair value or changes in future cash flows. The analysis is based on the assumption that interest rates changed by +/- 50 basis points (2008 - +/- 75 basis points) from the year end rates with all other variables held constant.

(b) Summarised Sensitivity Analysis

The following table summarises the sensitivity of the Funds' operating profit or loss and net assets attributable to unitholders to interest rate risk, foreign exchange risk and other price risk. The reasonably possible movements in the risk variables have been determined based on management's best estimate, having regard to a number of factors, including historical levels of changes in interest rates and foreign exchange rates, historical correlation of the Funds' investments with the relevant benchmark and market volatility. However, actual movements in the risk variables may be greater than anticipated due to a number of factors, including unusually large market shocks resulting from changes in the performance of and/or correlation between the performance of the economies, markets and securities in which the Funds invest. As a result, historic variations in risk variables should not be used to predict future variations in the risk variables.

Review of Operations

Income

The income distributions per unit for the Fund for the year ended 30 June 2009 and 30 June 2008 are shown in Note 3 to the financial statements.

Exit Prices

The exit price is the price at which unitholders realise an entitlement in a Fund and is calculated by deducting a predetermined cost of selling (commonly known as the "sell spread"), if applicable, from the net asset value per unit ("NAV unit price") of a Fund. NAV unit price is calculated by taking the total fair value of all of a Fund's assets on a particular day, adjusting for any liabilities and then dividing the net fund value by the total number of units held by unitholders on that day. Financial assets and liabilities held for trading for unit pricing purposes are valued on a "last sale" price basis.

The exit price as at 30 June 2009 as the Fund was \$0.6256 (2008 - \$0.8733).

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 30 JUNE 2009**

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of Preparation

The financial report is a general purpose financial report, which has been prepared in accordance with the Fund's Constitution and the requirements of the Corporations Act 2001, which includes Accounting Standards. Other mandatory professional reporting requirements have also been complied with.

The financial statements for the year ended 30 June 2009, have not been prepared on a going concern basis, but instead prepared on a liquidation basis. As at the 30 June 2009, the termination process of the Fund has been substantially completed.

The financial report was prepared on the basis of fair value measurement of assets and liabilities except where otherwise stated.

The Balance Sheet is presented on a liquidity basis. Assets and liabilities are presented in decreasing order of liquidity and are not distinguished between current and non-current. All balances are expected to be settled within twelve months, except for financial assets held for trading and net assets attributable to unitholders. The amounts expected to be recovered or settled after more than twelve months in relation to these balances cannot be reliably determined, except as otherwise stated.

The financial report was authorised for issue by the Directors of the Responsible Entity on 28 August 2009.

Both the functional and presentation currency of the Fund is Australian dollars.

(b) Statement of Compliance

The financial report complies with Australian Accounting Standards, which include Australian equivalents to International Financial Reporting Standards ('AIFRS'). Compliance with AIFRS ensures that the financial report, comprising the financial statements and notes thereto, complies with International Financial Reporting Standards ('IFRS').

(c) Investments in Financial Assets and Liabilities Held for Trading

Classification

The Fund's investments are classified as held for trading and initially recognised at fair value not including transaction costs, which are expensed in the income statement.

Recognition/Derecognition

The Fund's recognise financial assets and financial liabilities on the date it becomes party to the contractual agreement (trade date) and recognises changes in fair value of the financial assets or financial liabilities from this date.

The derecognition of a financial instrument takes place when the Fund no longer controls the contractual rights that comprise the financial instrument, which is normally the case when the instrument is sold, or all the cash flows attributable to the instrument are passed through to an independent third party.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 30 JUNE 2009

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(c) Investments in Financial Assets and Liabilities Held for Trading (continued)

Measurement

After initial recognition, the financial assets held for trading are revalued to fair value at each reporting date.

For investments where there is no quoted market price, fair value is determined by reference to the current market value of another instrument which is substantively the same or is calculated based on the expected cash flows of the underlying net asset base of the investment. The fair value of units in unlisted Managed Investment Schemes is determined by reference to published bid prices at the close of business on the Balance Sheet date being the redemption price as established by the underlying Fund's Responsible Entity.

Gains or losses on investments held for trading are recognised in the Income Statements. Investments of the Funds which are considered to be held for trading are investments in Managed Investment Schemes.

(d) Investment Income

Income is recognised to the extent that it is probable that the economic benefits will flow to the Fund and the income can be reliably measured. The following specific recognition criteria must also be met before income is recognised:

Distribution income

Income is recognised when the right to receive the payment is established.

Interest income

Income is recognised as the interest accrues (using the effective interest rate method, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument) to the net carrying amount of the financial asset.

Changes in fair value of financial assets held for trading

Gains or losses on investments held for trading are calculated as the difference between the fair value at sale, or at year end, and the fair value at the previous valuation point. This includes both realised and unrealised gains and losses.

(e) Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise cash at bank, deposits at call with futures clearing house and short-term deposits with an original maturity of three months or less.

For the purposes of the Cash Flow Statement, cash and cash equivalents are as defined above, net of outstanding bank overdrafts.

(f) Trade and Other Receivables

Receivables are recognised and carried at the original invoice amount, less a provision for any uncollectible debts. An estimate for doubtful debts is made when collection of an amount is no longer probable. Bad debts are written off when identified.

Amounts are generally received within 30 days of being recorded as receivables.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(g) Trade and Other Payables

Liabilities for creditors are carried at cost, which is the fair value of the consideration to be paid in the future for goods and services received, whether or not billed to the Fund.

Payables include outstanding settlements on the purchase of financial assets and liabilities held for trading and distributions payable. The carrying period is dictated by market conditions and is generally less than 30 days.

(h) Taxation

Under current legislation, the Fund is not subject to income tax provided the unitholders are presently entitled to the income of the Fund and the Fund fully distributes their taxable income.

(i) Distributions

In accordance with the Fund's Constitution, the Fund fully distributes its distributable income to unitholders. Distributions are payable at the end of each quarter. Such distributions are determined by reference to the taxable income of the Fund. Distributable income includes capital gains arising from the disposal of financial assets and liabilities held for trading. Unrealised gains and losses on financial assets and liabilities held for trading that are recognised as income are transferred to net assets attributable to unitholders and are not assessable and distributable until realised. Capital losses are not distributed to unitholders but are retained to be offset against any realised capital gains.

(j) Net Assets Attributable to Unitholders

Under AASB 132 "Financial Instruments: Disclosure and Presentation", contractual obligations are regarded as liabilities. All net assets attributable to unitholders have been recognised as liabilities of the Fund, rather than as equity. The classification of net assets attributable to unitholders does not alter the underlying economic interest of the unitholders in the net assets and net profit attributable to unitholders of the Fund.

(k) Unit Prices

Unit prices are determined in accordance with the Fund's Constitution and are calculated as the net assets attributable to unitholders, divided by the number of units on issue. Financial assets and liabilities held for trading for unit pricing purposes are valued on a "last sale" price basis.

(l) Terms and Conditions on Units

Each unit issued confers upon the unitholder an equal interest in the Fund, and is of equal value. A unit does not confer any interest in any particular asset or investment of the Fund. Unitholders have various rights under the Constitution and the Corporations Act 2001, including the right to:

- have their units redeemed;
- receive income distributions;
- attend and vote at meetings of unitholders; and
- participate in the termination and winding up of the Fund.

The rights, obligations and restrictions attached to each unit are identical in all respects.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 30 JUNE 2009**

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(m) Goods and Services Tax (GST)

Income, expenses and assets, with the exception of receivables and payables, are recognised net of the amount of GST to the extent that the GST is recoverable from the taxation authority. Where GST is not recoverable, it is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable.

Receivables and payables are stated inclusive of GST.

Reduced input tax credits (RITC) recoverable by the Fund from the Australian Taxation Office are recognised as receivables in the Balance Sheet.

Cash flows are included in the Cash Flow Statement on a gross basis. The GST component of cash flows, which is recoverable from, or payable to, the taxation authority is classified as operating cash flows.

(n) Expense Recognition

Expenses are recognised in the Income Statement when the Fund has a present obligation (legal or constructive) as a result of a past event that can be reliably measured. Expenses are recognised in the Income Statement if expenditure does not produce future economic benefits that qualify for recognition in the Balance Sheet.

(o) Use of estimates

The Fund makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates are continually evaluated and based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

For the majority of the Fund's financial instruments, quoted market prices are readily available. However, certain financial instruments, for example, over-the-counter derivatives or unquoted securities are fair valued using valuation techniques. Where valuation techniques (for example, pricing models) are used to determine fair values, they are validated and periodically reviewed by experienced personnel of the Responsible Entity, independent of the area that created them. Models are calibrated by back-testing to actual transactions to ensure that outputs are reliable.

Models use observable data, to the extent practicable. However, areas such as credit risk (both own and counterparty), volatilities and correlations require management to make estimates. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(p) New Application of Accounting Standards

Certain new accounting standards and interpretations have been published that are not mandatory for 30 June 2009 reporting periods. The impact of these new standards and interpretations is set below:

- AASB 8 "Operating Segments" and AASB 2007-3 "Amendments to Australian Accounting Standards" arising from AASB 8.

AASB 8 and AASB 2007 - 3 are effective for annual reporting periods beginning on or after 1 January 2009. The Fund has not adopted these standards early. Application of these standards will not affect any of the amounts recognised in the financial statements, but may affect the segment disclosures provided in Note 9.

- Revised AASB 101 "Presentation of Financial Statements Revised" and AASB 2007-8 "Amendments to Australian Accounting Standards" arising from AASB 101.

AASB 101 (Revised) is applicable to annual reporting beginning on or after 1 January 2009. The Fund has not adopted this standard early. It requires the presentation of a statement of comprehensive income and makes changes to the statement of changes in equity will not affect any amounts recognised in the financial statements. If a Fund has made a prior period adjustment or has re-classified items in the financial statement, it will need to disclose a third Balance Sheet, this one being at the beginning of the comparative period.

- AASB 132 Financial Instruments: Presentation and AASB 2008-2 Amendments to Australian Accounting Standards - Puttable Financial Instruments and Obligations Arising on Liquidation (Revised AASB 132).

Revised AASB 132 is applicable for reporting periods beginning on or after 1 January 2009. The Fund has not adopted this standard early. Application of this standard will not affect any of the amounts recognised in the financial statements as the Fund is obligated to distribute all of its taxable income in accordance with the Fund's Constitution. Accordingly, there will be no change to classification of unitholders' funds as a liability and therefore no impact on profit or loss and equity.

- AASB 7 Financial Instruments: Disclosure and AASB 2009-2 Amendments to Australian Accounting Standards - Improving Disclosures about Financial Instruments

Revised AASB 7 is applicable for reporting periods beginning on or after 1 January 2009. The Fund has not adopted this standard early. The amendments require fair value measurement disclosures to be classified into a new three-level hierarchy and additional disclosures for items whose fair value is determined by valuation techniques rather than observable market values. The amendments will not affect any of the amounts recognised in the financial statements but may affect certain disclosures.

(q) Comparatives

Comparative figures are, where appropriate, reclassified so as to be comparable with the figures and presentation in the current year.

2. AUDITORS' REMUNERATION

Auditors' remuneration in respect of auditing the financial reports is fully paid by the Responsible Entity.

Other services provided by the auditors are the audit of the compliance plan of the Fund and tax compliance services. The auditors' non-audit remuneration is not paid by the Fund.

7. SEGMENT REPORTING

The Fund operates in one business segment, being investment management. The Fund also operates from one geographic location being Australia, from where its investing activities are managed. Income is derived from dividends, interest, gains on the sale of investments, and unrealised changes in the value of investments.

8. FINANCIAL RISK MANAGEMENT

The Fund's activities expose it to a variety of financial risks: market risk (including price risk and interest rate risk), credit risk and liquidity risk.

The Fund's overall risk management programme focuses on ensuring compliance with the Fund's Information Memorandum and seeks to maximise the returns derived for the level of risk to which the Fund is exposed. The Fund uses derivative financial instruments to alter certain risk exposures. Financial risk management is carried out by the investment management department (Investment Manager) and regularly monitored by the Compliance Department of the Responsible Entity.

The Fund uses different methods to measure different types of risk to which it is exposed. These methods include sensitivity analysis in the case of interest rate, foreign exchange and other price risks and ratings analysis for credit risk.

(a) Market Risk

(i) Price risk

The Fund's financial assets are either directly or indirectly exposed to price risk. This arises from investments held by the Fund for which prices in the future are uncertain. They are classified on the balance sheet at fair value through profit or loss. All securities investments present a risk of loss of capital.

Where non-monetary financial instruments are denominated in currencies other than the Australian dollar, the price in the future will also fluctuate because of changes in foreign exchange rates. Paragraph (ii) below sets out how this component of price risk is managed and measured.

The Investment Manager mitigates price risk through diversification and a careful selection of securities and other financial instruments within specified limits and guidelines in accordance with the Product Disclosure Statement/Information Memorandum or Constitution which is regularly monitored by the Compliance Department of the Responsible Entity.

The table in Note 8 (b) summarises the impact of an increase/decrease of the Australian and global indexes on the Fund's net assets attributable to unitholders at 30 June 2009 and 30 June 2008. The analysis is based on the assumptions that the relevant indexes increased or decreased as tabled in Note 8 (b) with all other variables held constant, and that the fair value of the Funds' which have indirect exposures to equity securities and derivatives moved according to the historical correlation with the indexes. Funds that invest in various asset classes, such as multi-sector Funds, will have a weighted average movement calculated based on the proportion of their investments in the those classes.

(ii) Interest rate risk

The Fund's exposure to interest rate risk is limited to its cash and cash equivalents, which earns a floating rate of interest.

The table in Note 8 (b) summarises the impact of an increase/decrease of interest rates on the Fund's operating profit and net assets attributable to unitholders through changes in fair value or changes in future cash flows. The analysis is based on the assumption that interest rates changed by +/- 50 basis points (2008: +/- 75 basis points) from the year end rates with all other variables held constant.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 30 JUNE 2009**

8. FINANCIAL RISK MANAGEMENT (continued)

(b) Summarised Sensitivity Analysis

The following table summarises the sensitivity of the Fund's operating profit or loss and net assets attributable to unitholders to interest rate risk and other price risk. The reasonably possible movements in the risk variables have been determined based on management's best estimate, having regard to a number of factors, including historical levels of changes in interest rates and historical correlation of the Fund's investments with the relevant benchmark and market volatility. However, actual movements in the risk variables may be greater than anticipated due to a number of factors, including unusually large market shocks resulting from changes in the performance of and/or correlation between the performance of the economies, markets and securities in which the Fund invests. As a result, historic variations in risk variables should not be used to predict future variations in the risk variables.

	Interest rate risk		Price risk	
	Impact on operating profit/(loss) and net assets attributable to unitholders			
	-50 basis points \$	+50 basis points \$	-1.23% \$	1.36% \$
30/06/2009	(1,201)	1,201	(32,739)	36,199
	-75 basis points \$	+75 basis points \$	-1.23% \$	1.36% \$
30/06/2008	(836)	836	(159,501)	176,359

(c) Credit risk

Credit risk arises from cash and cash equivalents, deposits with banks and other financial institutions and amounts due from brokers.

The exposure to credit risk for cash and cash equivalents is low as all counterparties have a rating of AA or higher (as determined by the Standard and Poor's or equivalent agency).

(d) Fair Value Estimation

The carrying amounts of the Funds' assets and liabilities at the balance sheet date approximate their fair values.

The Fund's financial liabilities primarily consist of trade payables which include redemptions payable to unitholders at year end as well as other payables such as the accruals of management fees and distributions payable at year end. All financial liabilities of the Funds are contractually due within 30 days.

9. CONTINGENT LIABILITIES AND COMMITMENTS

As at 30 June 2009 the Fund has no contingent liabilities and commitments (2008 - none).

10. EVENTS AFTER BALANCE SHEET DATE

Since the reporting date no significant events have occurred that required reporting (2008 - none).
