Past performance is not an indicator of future performance for this option or any other option available from Colonial First State.

Returns are calculated on a cumulative year-on-year basis which are then annualised. For funds that have been in existence for less than one year, the since inception performance is actual performance since inception and not annualised. Calculations are based on exit price to exit price with distributions reinvested, after ongoing fees and expenses but excluding individual tax, member fees and entry fees (if applicable). Please refer to the PDS for full details of the applicable fees, costs, and benchmarks.

Investment objective

To provide relatively stable returns with low potential for capital loss by investing in Australian and global fixed interest securities. To outperform the composite benchmark of 50% Bloomberg Global Aggregate Index, hedged to Australian dollars and 50% Bloomberg AusBond Composite 0+Yr Index over rolling three-year periods before fees and taxes.

Investment strategy

To invest in a diversified portfolio of government and corporate bonds that aims to deliver relatively stable returns with less fluctuation than investing in shares and property. The investments are managed by a number of leading active fixed interest managers who aim to outperform the index. This is designed to deliver more consistent returns with less risk than would be achieved if investing with a single investment manager. The portfolio aims to hedge currency risk.
