Past performance is not an indicator of future performance for this option or any other option available from Colonial First State.

Returns are calculated on a cumulative year-on-year basis which are then annualised. For funds that have been in existence for less than one year, the since inception performance is actual performance since inception and not annualised. Calculations are based on exit price to exit price with distributions reinvested, after ongoing fees and expenses but excluding individual tax, member fees and entry fees (if applicable). Please refer to the PDS for full details of the applicable fees, costs, and benchmarks.

### Investment objective

To provide long-term growth with moderate tax-effective income. The option aims to outperform the S&P/ASX 300 Accumulation Index over rolling three-year periods before fees and taxes.

### Investment strategy

The option predominantly invests in listed large cap Australian equities in the S&P/ASX 300 Index. The option seeks to identify earnings and earnings revisions at an early stage, and hence to pre-empt stock price movements. The manager also seeks to position the portfolio towards those sectors and stocks which it believes will experience positive earnings revisions and away from those it believes will suffer negative revisions.
