^ MSCI World Net Index (100%)

Past performance is not an indicator of future performance for this option or any other option available from Colonial First State.

Returns are calculated on a cumulative year-on-year basis which are then annualised. For funds that have been in existence for less than one year, the since inception performance is actual performance since inception and not annualised. Calculations are based on exit price to exit price with distributions reinvested, after ongoing fees and expenses but excluding individual tax, member fees and entry fees (if applicable). Please refer to the PDS for full details of the applicable fees, costs, and benchmarks.

Investment objective

To maximise risk-adjusted, long-term returns by investing in undervalued stocks and short selling overvalued stocks from around the world, while carefully controlling portfolio risk and transaction costs. The option aims to outperform the MSCI World Index over rolling four-year periods before fees and taxes.

Investment strategy

Acadian's investment approach employs structured stock and peer group valuation models, which are designed to capture a broad range of relevant characteristics such as value, earnings growth and price-related factors. Undervalued stocks will be purchased and overvalued stocks will be selectively short sold. The option will generally maintain a gross long exposure of 130% and a gross short exposure of 30% (130/30).

Investment category

Specialist Share

Minimum suggested timeframe

At least 7 years

Investment ranges

Asset class	Range	Benchmark
Cash	0% - 5%	0%
