Returns are calculated on a cumulative year-on-year basis which are then annualised. For funds that have been in existence for less than one year, the since inception performance is actual performance since inception and not annualised. Calculations are based on exit price to exit price with distributions reinvested, after ongoing fees and expenses but excluding individual tax, member fees and entry fees (if applicable). Please refer to the PDS for full details of the applicable fees, costs, and benchmarks.

Investment objective

To deliver superior investment performance by taking a long-term investment view and integrating sustainability research within a rigorous fundamental equity analysis framework. The option aims to outperform the MSCI World (ex Australia) Index over rolling three-year periods before fees and taxes.

Investment strategy

To invest in high quality, attractively priced businesses with strong management teams that are capable of delivering superior long-term returns, recognising that sustainability factors directly affect long-term business profitability. Whilst hedging may be used to manage currency exposures against the relevant benchmark, overall currency exposure will not be hedged back into Australian dollars.
