Past performance is not an indicator of future performance for this option or any other option available from Colonial First State.

All returns are calculated on an annualised basis using exit price to exit price with distributions reinvested, net of management costs, transaction costs and for FirstChoice Employer Super net of tax payable by the trustee. All return calculations exclude contribution surcharge, excess contribution tax or individual taxes payable by the investor and all other fees and rebates disclosed in the relevant Product Disclosure Statements (PDSs). For FirstChoice Investments, the 'distribution' component is the amount paid by the way of distribution, which may include net realised capital gains.

Please refer to the PDS for full details of the applicable fees, costs, and benchmarks.

Investment objective

To provide long-term capital growth from a diversified portfolio of global shares. To outperform the MSCI All Country World ex Australia Index, hedged to Australian dollars over rolling three-year periods before fees and taxes.

Investment strategy

To invest in a diversified portfolio of companies. The investments are managed by a number of leading global share managers which have different, yet complementary, investment styles, which is designed to deliver more consistent returns with less risk than would be achieved if investing with a single investment manager. The underlying managers of this option have guidelines for managing currency exposure and some may use long short strategies. The overall portfolio aims to hedge currency risk.
