^ RBA Cash Rate (100%)

Past performance is not an indicator of future performance for this option or any other option available from Colonial First State.

Returns are calculated on a cumulative year-on-year basis which are then annualised. For funds that have been in existence for less than one year, the since inception performance is actual performance since inception and not annualised. Calculations are based on exit price to exit price with distributions reinvested, after ongoing fees and expenses but excluding individual tax, member fees and entry fees (if applicable). Please refer to the PDS for full details of the applicable fees, costs, and benchmarks.

Investment objective

To generate significant medium-term capital growth independent of overall movements in traditional stock and bond markets within a rigorous risk management framework. The fund aims to provide a return greater than the Reserve Bank of Australia cash rate over rolling three-year periods after fees and taxes.

Investment strategy

Aspect takes a quantitative and systematic investment approach. Aspect's trend-following systems trade in over 230 of the most liquid global futures and forward markets and employ a fully automated system to process and analyse market data as well as idiosyncratic non-price data in order to identify and exploit directional moves (or 'trends') in markets. By maintaining comparatively small exposures to any individual contract, Aspect achieves sector and contract diversification. The option aims to minimise unintentional currency exposure.
