Investment options

Pooled Superannuation Trust

Australian Share Option

Objective

To provide long-term capital growth by investing in a broad selection of Australian companies.

Strategy

Colonial First State's 'GDP Plus' approach is based on the belief that, over the medium-to-long term, share prices are driven by growth in a company's earnings, despite the existence of sentiment which can lead to short-term price volatility. The strategy of the option is therefore to invest in quality companies, with strong balance sheets, whose earnings are expected to grow at a greater rate than the Australian economy as a whole. The option predominantly invests in Australian companies and therefore does not hedge currency risk.

Underlying manager

Colonial First State Global Asset Management

Conservative Option

Objective

To provide a regular return while maintaining and potentially increasing the value of your capital over the medium term.

Strategy

The broad asset allocation is to be 30% invested in growth assets (shares and property) and 70% in defensive assets (fixed interest and cash). Allocations are reviewed regularly although changes are infrequent, and a reallocation would only be considered in response to a fundamental change in long-term expectations or market demand. We seek to add value through a disciplined approach to selection of the shares and other assets held in the option. For risk management purposes, the option indexes part of its global share exposure and may partially hedge currency risk.

Diversified Option

Objective

To provide medium-to-long-term capital growth, together with some regular return, by investing in cash, fixed interest, property and shares.

Allocations are reviewed regularly although changes are infrequent, and a reallocation would only be considered in response to a fundamental change in long-term expectations or market demand. Property Securities Option

Objective

To provide medium-to-long-term capital growth, together with some regular return, by investing in cash, fixed interest, property and shares.

Strategy

The option's strategy is to add value by evaluating each underlying property and selecting trusts/companies for anticipated outperformance against other trusts/companies in the sector. The option predominantly invests in Australian listed property investments and therefore does not hedge currency risk.

Information on fees and charges

Application fees and exit fees

There are no application fees or exit fees payable upon entering or leaving the Trust.

Investment transaction costs

The entry and exit unit prices reflect an adjustment to net tangible assets (NTA) to allow for transaction costs (such as stamp duty and brokerage) as follows:

Colonial First State Pooled Superannuation Trust	Transaction Costs on Entry/Exit July 2015 to 30 June 2016		Transaction Costs on Entry/Exit 1 July 2014 to 30 June 2015

Ongoing fees and expenses

Trustee fees

Colonial First State Investments Limited is entitled to receive a fee based on the gross assets of each investment option. The fee is payable at the end of each month. The amount of this fee is shown in the table below.

The Trustee fees are paid out of the Trust and are expressed as a percentage of the gross assets of each investment option at the following rates:

Colonial First State Pooled Superannuation Trust	Trustee fees 1 July 2015 to 30 June 2016 % pa
Conservative Option	0.75%
Diversified Option	0.95%
Australian Share Option	0.95%
Property Securities Option	0.80%

The trust deed allows a maximum trustee fee of 2.00% per annum.

Where monies are invested into other schemes managed by the Trustee, the Trustee's fee is calculated after taking into account management fees charged in the underlying schemes.

As a consequence, the amount shown as Trustee fees in the Statement of Financial Performance reflects only the amount of fees charged directly to the Trust.

Ongoing operating expenses

The Trust Deed allows for the ongoing operating expenses (such as registry, audit, taxation advice, expenses prospectus, accounts, stationery and postage) to be paid directly from each investment option. However, until further notice the Trustee will pay such amounts. No limit is placed on the amount of the ongoing expenses that can be paid from each investment option.

Other costs

Transaction costs (bank charges and account transaction charges) are paid out of the options. Some of these costs are recouped by making an adjustment to the NTA for applications and withdrawals.

Abnormal costs (such as costs of investor meetings, changes to the Trust Deed and defending legal proceedings, and special valuations of assets) are payable from the Trust. These costs are relatively unusual, fairly infrequent costs and tend to be relatively insignificant over time.

Information on fees and charges

Likely developments and expected results of operations

The Trust will continue to pursue its current investment policy in accordance with the objectives as set out in the Product Disclosure Statement.

At the time of preparing this report the Trustee is not aware of any likely developments which would impact upon the future operations of the Trust.

Other important information

Temporary residents

If you are a temporary resident and have not requested a Departing Australia Superannuation Payment (DASP) benefit within six months of the later of your temporary visa expiring and the date you are leaving the country, we may be required to pay your account balance to the ATO, under Division 3 of Part 3A of the Superannuation (Unclaimed Money and Lost Members) Act 1999. In these circumstances you will no longer be a member of the Fund and you will lose any insurance cover. You will also no longer be invested in your chosen investment option(s). We are not obliged to notify or give an exit statement to you in this circumstance as allowed by ASIC Class Order 09/437. Once your account balance has been transferred to the ATO, you may claim your benefit by contacting the ATO and downloading a DASP application from its website, ato.gov.au, or by calling on 13 10 20 or emailing it at DASPmail@ato.gov.au.

Superannuation contribution surcharge

The superannuation surcharge was a tax paid by higher income earners on certain super contributions and employer-paid ETPs. The superannuation surcharge has been abolished for contributions made after 1 July 2005. Superannuation surcharge still applies to contributions made in previous years and these amounts will continue to be assessed by the Australian

Taxation Office (ATO).

The ATO will contact the investor directly regarding any superannuation surcharge obligations. Surcharge may be deducted from the investor's account and will be taken in proportion to the amounts held in the investor's different investment holdings at that time.

Transfer to the Eligible Rollover Fund (ERF)

If an investor's account is low, or written communications are returned unclaimed (defined as 'lost' under superannuation law), then their benefit may be transferred to an ERF (after deducting any outstanding fees, taxes and liabilities). We will contact the investor at their last known address before transferring their account to the ERF.

The ERF selected by Colonial First State is the SuperTrace Eligible Rollover Fund (SuperTrace) which can be contacted at:

Fund Administrator
SuperTrace Eligible Rollover Fund (SuperTrace)
Locked Bag 5429
Parramatta NSW 2124
Freecall: 1300 788 750

If an investor's benefit is transferred to SuperTrace, they will cease to be a member of the Fund. Investors will cease to have rights associated with the Fund, and will no longer receive regular statements from Colonial First State. Being transferred to the ERF may affect your benefits for the following reasons:

- You will become a member of the SuperTrace fund and be subject to its governing rules.
- You can contact SuperTrace to ask for a copy of its PDS.
- SuperTrace will apply a different fee structure. You should refer to its PDS for circumstances in which fees may apply.
- SuperTrace does not offer insurance benefits in the event of death or disablement.
- SuperTrace invests your benefit in a low risk strategy, which directly affects the rate of interest credited to your account. You should evaluate whether this strategy is appropriate to your specific circumstances.
