Investment information

What are FirstRate Deposit products?

FirstRate Deposit products are a range of products which allow you to keep your cash portion of your portfolio growing alongside your other investments.

FirstRate Term Deposit products

FirstRate Term Deposit products allow you to lock away a competitive interest rate for periods from three months to 15 years with a range of interest payment options. It's a helpful facility allowing you to invest with the confidence of knowing upfront exactly what your return will be and how much you'll get at the end of the term.

Who are the parties involved?

FirstRate Deposit products are deposit products of Commonwealth Bank of Australia ('the Bank'), one of Australia's leading financial institutions. When you make or request a deposit to FirstRate Deposit products, you enter into an agreement with the Bank on the terms and conditions set out on pages 9 to 12.

The Bank has appointed Colonial First State Investments Limited to collect information, administer and otherwise deal with matters relating to FirstRate Deposit products.

Benefits of FirstRate Deposit products

- No fees.
There is no application fee, no account keeping fees or management fees.
- Peace of mind.
Knowing at the time what interest you will earn and that your money is on deposit with a leading Australian bank.
- Competitive interest rates.

Withdrawals from FirstRate Deposit products

FirstRate Deposit products are designed to be held for the full investment timeframe. Should you withdraw or switch all or part of your investment from FirstRate Deposit products prior to that date, early withdrawal adjustments may apply.

Details on how early withdrawal adjustments are calculated are outlined below.

For full withdrawals, the amount you receive will be equal to:

- your current balance, minus
- the amount calculated as an early withdrawal adjustment, plus
- interest that has accrued up to the date of your withdrawal.

Where the early withdrawal adjustment is greater than any accrued and previously reinvested interest, this amount would be deducted from your initial principal invested.

For partial withdrawals or switches, the amount you receive will be equal to the amount you requested, minus the amount calculated as the early withdrawal adjustment.

Early withdrawal adjustments worked examples are set out on pages 3 to 4.

Additional information on FirstRate Term Deposit products

How do you invest?

Investing in FirstRate Term Deposit products can be done by selecting any of the investment term options in your investment or switch allocation.

Please note: Special conditions apply when applying for FirstRate Term Deposit products between 1 July and 9 July. If we receive funds for a FirstRate Term Deposit product during this time, we will deposit your investment in FirstRate Saver products until the NSW business day following 9 July.

When is the maturity date?

The maturity date is calculated from the date of your deposit in FirstRate Term Deposit products plus your investment term (in months). If the maturity date falls on a weekend or public holiday in NSW, the maturity date will be the next NSW business day.

Please note: Special rules apply if the maturity date would fall on a date between 1 July and 9 July, in which case the maturity date will be set to the NSW business day following 9 July.

When is interest paid?

Monthly, annual or maturity interest payments are available, depending on the FirstRate Term Deposit product chosen. Refer to clause 5 of the Terms and Conditions for more information on how interest is paid.

For monthly frequencies:

- interest is paid on the last calendar day of the month.

For annual frequencies:

- where the commencement date is the last day of the calendar month, interest will be paid on the last day of the calendar month in which the payment is due
- where the commencement date is a day other than the last day of the calendar month, interest will be paid on the last day of the calendar month prior to the month in which the payment is due.

For monthly and annual frequencies:

- the first interest payment will be pro-rated based on the number of days from commencement to the date the first interest payment is due
- the last interest payment will be pro-rated based on the number of days from the previous payment to the maturity date.

For interest at maturity options, interest will be credited on the maturity date.

Refer to 'Withdrawing prior to maturity' below for information on how interest is paid if you need to withdraw before the maturity date.

How is interest calculated?

Interest is calculated daily on your FirstRate Term Deposit product using the simple interest formula:

$$\text{Interest} = \text{Deposit amount} \times \text{Interest rate (pa)} \times (\text{Term in days} \div 365)$$

'Term in days' is calculated including the date you start your term deposit and exclusive of the maturity day.

What happens to your FirstRate Term Deposit products at maturity?

At maturity of a FirstRate Term Deposit product, the applicable interest will be credited and the balance of that term deposit withdrawn.

We will send you a maturity notice showing your current maturity instructions approximately one week prior to the FirstRate Term Deposit product's maturity date.

You should refer to the current PDS and interest rates (both available at colonialfirststate.com.au) prior to your FirstRate Term Deposit product's maturity, as they will apply on any reinvestment.

You can instruct us if you would like to invest the proceeds from your matured FirstRate Term Deposit product, using one of the following options:

- invest in a new FirstRate Term Deposit product for the same investment term
- invest in a new FirstRate Term Deposit product for a different investment term
- invest in the FirstRate Saver product
- invest in line with your future investment selection.

Unless you instruct us otherwise, the maturity proceeds will be reinvested in the FirstRate Term Deposit products for the same investment term at the interest rate prevailing on the date of maturity. This may vary significantly from the interest rate that applied to the matured term deposit.

Your instruction must be received by us prior to 3pm (Sydney time) on the business day prior to maturity.

Withdrawing prior to maturity (early withdrawals)

The fixed interest rate on FirstRate Term Deposit products is based on you investing the funds until the maturity date.

If you need to withdraw before the maturity date, the interest you receive will be reduced or the amount you receive may be subject to an adjustment (reduction), depending on the investment term you choose.

Early withdrawals can only be made at the discretion of the Bank.

FirstRate Term Deposit products for terms up to and including 12 months

Early withdrawal will reduce the rate of interest on the amount that you withdraw.

The reduction in the interest rate will depend on the percentage of the original term elapsed when your withdrawal is made as outlined in the chart below.

% of the investment term elapsed	% of the interest rate that applies
0% to less than 20%	10%
20% to less than 40%	20%
40% to less than 60%	40%
60% to less than 80%	60%
80% to less than 100%	80%

Example – full withdrawal¹

You deposit \$10,000 in FirstRate Term Deposit products with a 12-month investment term. The fixed interest rate is 5%. Assuming you hold the full deposit to maturity, the interest payable is \$500 ($\$10,000 \times 5\%$).

After six months or 50% of the investment term has elapsed, the interest accrued is \$250 ($\$500 \times 50\%$). If you withdraw at this time, the interest rate that will apply will be 40% of the original interest rate or 2% ($40\% \times 5\%$).

The interest paid with your full withdrawal proceeds is \$100 ($\$10,000 \times 2\% \times 50\%$).

Example – partial withdrawal¹

Instead of withdrawing the full balance as in example 1, you make a partial withdrawal of \$6,000.

The interest rate that will apply on the \$6,000 that you have withdrawn will again be 40% of the original interest rate or 2% ($40\% \times 5\%$). Therefore, the interest payable on this \$6,000 is \$60 ($\$6,000 \times 2\% \times 50\%$).

The \$4,000 remaining in the deposit will receive the original 5% interest rate (assuming there are no other withdrawals made). The interest payable on this amount is \$200 ($\$4,000 \times 5\%$).

Therefore, in this example, at maturity, your total interest received would be \$260.

FirstRate Term Deposit products for terms greater than 12 months

When you request to withdraw or switch from FirstRate Term Deposit products, you will withdraw from the deposit held with the Bank. The Bank applies a withdrawal adjustment rate as a reasonable estimate of the costs, if any, in replacing or terminating the Bank's arrangements in connection with FirstRate Term Deposit products.

These costs can include break costs, administrative costs and funding costs. Some major influences that may affect the size of early withdrawal adjustments are:

- market interest rates are higher than when you acquired the term deposit
- liquidity in the financial markets
- market pricing of credit risk, and
- time remaining until you meet the minimum suggested timeframe.

The Bank provides us with the withdrawal adjustment rate and we deduct this cost from your withdrawal or switch proceeds. As the costs are influenced by market conditions, we cannot provide certainty regarding the amount of the withdrawal adjustment until the date of your early withdrawal request.

Details on how early withdrawal adjustments are calculated are outlined below.

For full withdrawals or switches, the amount you receive will be equal to:

- your current balance, minus
- the amount calculated as an early withdrawal adjustment, plus
- interest that has accrued up to the date of your withdrawal.

Where the early withdrawal adjustment is greater than any accrued and previously reinvested interest, this amount would be deducted from your initial principal invested.

For partial withdrawals or switches, the amount you receive will be equal to the amount you requested, minus the amount calculated as the early withdrawal adjustment.

¹ Example is for illustrative purposes only.

Example¹

You have invested \$10,000 in a FirstRate Term Deposit product on 30 November 2014, with a maturity date of 30 November 2019, at an interest rate of 4.30%.

On 30 November 2015, you request an early withdrawal for \$1,000 from your FirstRate Term Deposit product.

At this time, the Bank determines that the withdrawal adjustment rate is 1.00% pa.

The Bank will apply the withdrawal adjustment rate to the withdrawal amount based on the time remaining until maturity. That is:

$$\$1,000 \times 1.00\% \times 4 = \$40$$

A discount factor is then provided by the Bank and is applied to determine the net present value of this amount. In this example, the discount factor is 0.95.

Early withdrawal adjustment = \$38 (\$40 × 0.95 (discount factor calculated by the Bank at time of withdrawal)).

Please note: The withdrawal adjustment is applied to the whole withdrawal amount (including reinvested interest). Your interest rate for the remaining term is unchanged.

It is possible that you may receive back a net amount that is less than the amount of initial principal invested.

Early withdrawals across multiple FirstRate Term Deposit products

If you hold multiple FirstRate Term Deposit products in your account and withdraw part of the option balance, you can specify in writing, or by contacting us on 13 13 36, how you would like the withdrawal applied across each individual term deposit.

The table and examples below explain the order that will apply to:

- all switch transactions, or
- withdrawals when you have not provided a specific instruction.

If the withdrawal amount is	Rule applied
Less than the balance of the next term deposit to mature	100% from the next term deposit to mature
Greater than or equal to the next term deposit to mature	Deducted from all term deposits in a proportional weighting

Example¹

You have a total of \$15,000 invested in FirstRate Term Deposit products with three-month terms. The total is made up of two term deposits as detailed below:

Term deposit no.	Maturity date	Amount
1	10 August	\$10,000
2	5 September	\$5,000
Total		\$15,000

If you were to partially withdraw:

- \$9,000, the full \$9,000 will be deducted from the term deposit maturing in August.
- \$12,000, the proceeds will be deducted from both term deposits proportionally (\$12,000/\$15,000 = 80%).

Therefore, the withdrawal will be processed as follows:

Term deposit no.	Balance prior to withdrawal	% to be withdrawn	Amount to be withdrawn
1	\$10,000.00	80%	\$8,000.00
2	\$5,000.00	80%	\$4,000.00
Total	\$15,000.00	80%	\$12,000.00

Using FirstRate Term Deposit products with your FirstChoice account

Due to the fixed investment term that applies for FirstRate Term Deposit products, there are some tools that FirstChoice normally provides you and your adviser to manage your portfolio that will be restricted when you invest in FirstRate Term Deposit products.

This is primarily to help you manage your term deposits and avoid early withdrawals.

Future investment selection and regular investment plans – where you nominate an allocation for your regular investment plan, regular withdrawal plan or BPAY, EFT or other uninstructed additional investments, you will not be able to select FirstRate Term Deposit products.

Where your future investment selection is updated following a transaction that you request, any allocation that would have applied to FirstRate Term Deposit products will be applied proportionally across any other investment options in your future investment selection or the FirstRate Saver option if no other options are available.

Automatic rebalancing – if you make an investment in FirstRate Term Deposit products, we will cancel any existing auto-rebalancing facility. You can re-establish the facility and nominate a new investment weighting. Refer to the Reference Guide – Transacting on your account, page 7 for further details.

Other automated transactions – we recommend you do not nominate FirstRate Term Deposit products for deduction of any adviser service fees (as that will create early withdrawals). At the time that any rebates are credited, if you hold FirstRate Term Deposit products, rebates will be credited to FirstRate Saver products.

¹ Example is for illustrative purposes only.

Risks

What is risk?

Understanding investment risk is the key to successfully developing your investment strategy. Before you consider your investment strategy, it is important that you understand the risks that can affect your investment. All investments are subject to risk. This means that you can lose money on your investments or that they may not meet your objectives, such as growth in the value of your investments or the expected return from your investments.

What risks affect your investments?

The main risks which typically affect your investment in FirstRate Deposit products are:

Market risk

Market risk is the risk that prices including interest rates will move adversely. This means that your investment can be affected by things like changes in interest rates, investor sentiment and global events.

Legal and regulatory risk

This is the risk that any change in taxation, corporate or other relevant laws, regulations or rules may adversely affect your investment.

Counterparty credit risk

You are reliant on the ability of the Bank to meet its obligations to account to you under the terms of the FirstRate Deposit products. You are also reliant on Colonial First State to meet its obligations to you.

Term deposit risk

FirstRate Term Deposit products provide a fixed interest rate. This means you are protected from decreases in interest rates during the term of your investment. However, you may not be able to take advantage of interest rate increases should interest rates rise during the term of your investment.

No cooling-off period

There is no cooling-off period. You cannot cancel or revoke your deposit; however, you may withdraw subject to early withdrawal risks, outlined below.

Early withdrawal risk

FirstRate Deposit products are designed to be held for a specified period.

FirstRate Term Deposit products for terms up to and including 12 months

Should you need to withdraw or switch out from FirstRate Term Deposit products prior to the maturity date, the interest rate applying on the amount withdrawn is reduced.

FirstRate Term Deposit products for terms greater than 12 months

Withdrawals of all or part of your investment before the end of the specified period may be subject to an adjustment (reduction) to the withdrawal proceeds because of the recovery of costs and other charges connected with withdrawal. It is possible that you may receive back a net amount that is less than the amount of initial principal invested.

The amount of the reduction considers reasonable costs incurred in connection with termination or replacement of funding for FirstRate Deposit products. These costs can include break costs, administrative costs and replacement funding costs. Some major influences that may affect the size of the withdrawal costs are:

- market interest rates are higher than when you acquired the FirstRate Term Deposit product
- liquidity in the financial markets
- market pricing of credit risk
- the term remaining for the offer.

Role of your financial adviser

Your financial adviser is required to be qualified in understanding the risk and return associated with the wide range of financial products available to you and can help you make decisions regarding these financial products. Your financial adviser can assist you to meet your financial needs.

Terms and conditions for FirstRate Deposit products

The terms (including interest rates) of each FirstRate Deposit product can vary, in addition to this PDS and the terms and conditions, which are set out below and are in two parts:

Part 1 – Your agreement with the Bank (Deposit Agreement).

Part 2 – Your authorisation to CFS and the FirstChoice Investment products PDS (as relevant to the investment you hold), all of which are available at colonialfirststate.com.au or on request by calling 13 13 36.

When you (or any person you authorise) request to set up a FirstRate Deposit product, you declare that you have read and are bound by the terms and conditions contained in Parts 1 and 2.

In Part 1, 'the Bank', 'we', 'our' or 'us' refers to Commonwealth Bank of Australia ABN 48 123 123 124 AFSL 234945. 'CFS' refers to Colonial First State Investments Limited ABN 98 002 348 352. 'You' or 'your' means the person or persons or entity in whose name the FirstRate Deposit product is held, and, where the context permits, includes any person you authorise to give instructions on your behalf.

Any of the terms and conditions in Parts 1 and 2 which cancel, limit or modify the Bank's or CFS's liability to you, do so only to the maximum extent permissible by law. These terms and conditions do not exclude or modify any rights which cannot be excluded or modified under legislation.

You should read these terms and conditions carefully before lodging funds in a FirstRate Deposit product, and keep them for your future reference. You will then know what to expect from us and what we expect from you before becoming bound by the terms and conditions. You can ask us questions about any of the terms and conditions that you do not understand, and so avoid misunderstandings.

In addition, you should read the Bank's information booklet 'The Better Banking

Book', copies of which may be obtained by telephoning the Bank on 13 22 21 (24 hours a day, seven days a week), contacting your relationship manager, visiting our website at commbank.com.au or from any branch of the Bank.

The relevant provisions of the Banking Code of Practice apply to a FirstRate Deposit product if the FirstRate Deposit product is held by an individual, either alone or jointly with another individual, or by a small business customer.

Part 1 – Your agreement with the Bank (Deposit Agreement)

1 Role of CFS

1.1 CFS will administer FirstRate Deposit products on behalf of the Bank, including collection of information, provision of statements of account and handling questions and complaints. You must raise any matters regarding FirstRate Deposit products directly with CFS.

2 Eligibility, account opening procedures and joint accounts

2.1 To be eligible for FirstRate Deposit products and allow deposits to and withdrawals from your FirstRate Deposit products account, you must also hold in the same name a FirstChoice Investment products account issued by CFS. A minimum investment account balance and other terms are included in the FirstChoice Investment products PDS. You must read the PDS before investing. If you cease to hold a FirstChoice Investment products account, the Bank will close your FirstRate Deposit products account with the Bank.

2.2 If you open a joint account, CFS will accept instructions from either one of you. We are not obliged to enquire into the circumstances of any instructions you give in relation to the conduct of your joint FirstRate Deposit products. We are not liable for any loss or damage you or anyone else suffers due to us acting on those instructions in good faith, unless it is proved that we were

These costs can include break costs, administrative costs and funding costs.

 - when the full balance is withdrawn.
- 5.3 If you have instructed CFS to direct credit distributions received from your FirstChoice Investment products account to another nominated account with an Australian financial institution, CFS will ensure any interest credited is also transferred (by transferring funds equal to the interest amount from FirstRate Deposit products to the nominated account).
- 5.4 If you have instructed CFS to reinvest distributions received from your FirstChoice Investment products account, interest will be transferred to a FirstRate Saver account in your name. Detailed information and terms and conditions for FirstRate Saver are available with the FirstChoice Investment products PDS.

- 10.1 You can, at any time, by written notice to CFS, close your FirstRate Deposit products, in which case your remaining balance will be transferred to your FirstChoice Investment products account. This will trigger an early withdrawal adjustment as described on pages 2 to 4.

- 14.1 The Bank (including CFS in its capacity as administrator)

may be required to report information about you to the relevant authorities (including acting on instructions or directions from relevant authorities regarding your FirstRate Deposit products). The Bank or CFS may not be able to tell you when this occurs.

- 14.2 Notwithstanding any rights you may have under this Deposit Agreement, the Bank may not be able to transact with you or other persons associated with your FirstRate Deposit products. This may include (a) delaying, blocking, freezing or refusing to process a transaction, or (b) closing your FirstRate Deposit products account at any time (in the event that we reasonably believe you or any other person associated with your FirstRate Deposit products account is a Proscribed Person). This may impact on your investment and could result in a loss of income or capital invested.
