Past performance is not an indicator of future performance for this option or any other option available from Colonial First State.

Returns are calculated on a cumulative year-on-year basis which are then annualised. For funds that have been in existence for less than one year, the since inception performance is actual performance since inception and not annualised. Calculations are based on exit price to exit price with distributions reinvested, after ongoing fees and expenses but excluding individual tax, member fees and entry fees (if applicable). Please refer to the PDS for full details of the applicable fees, costs, and benchmarks.

Investment objective

To achieve a return of CPI plus 3.0% per annum over rolling ten-year periods after fees and taxes.

Investment strategy

To invest in a diverse range of assets that are expected to provide long-term capital growth, but which may have a high level of short-to-medium-term volatility. In the long term, the portfolio's exposure to assets with volatile returns will be reduced to provide greater short-term security. The option may use derivatives with the objective of managing portfolio volatility. The portfolio aims to hedge currency risk except for part of the allocation to global shares (which may include emerging market shares).

Investment category

High Growth

Minimum suggested timeframe

At least 10 years
