### Investment objective

To provide returns with a low correlation to equity markets from a diversified portfolio of alternative investment strategies. To provide a return of 4% per annum in excess of the Reserve Bank of Australia cash rate before fees and taxes over rolling three-year periods.

### Investment strategy

To invest in a diversified portfolio of alternative investment strategies with the underlying assets typically having relatively high liquidity. The investments are managed by a number of leading alternative investment managers, which is designed to deliver more consistent returns with less risk than would be achieved if investing with a single investment manager.
