Important information about reversionary beneficiaries

What is a reversionary beneficiary?

A reversionary beneficiary is the person you nominate to continue to receive your pension upon your death. You can nominate your reversionary beneficiary at the time of commencing your pension or any time after. Alternatively, you can make a non-lapsing death benefit nomination, which is a request by you to the trustee of FirstChoice to pay your death benefit to the person or persons nominated on your non-lapsing death benefit nomination form.

Who can I nominate as a reversionary beneficiary?

You can only nominate someone who is considered to be your dependant under superannuation legislation and is also a dependant who is eligible to receive a death benefit as a reversionary pension. This includes your spouse, child (see below for restrictions), financial dependant or person with whom you are in an interdependency relationship.

Please note: It is only possible to pay a death benefit in the form of a pension to your child if the child is, at the time of your death:

- under 18, or
- aged 18 to less than 25 and financially dependent on you, or
- disabled.

In addition, where your pension reverts to an eligible child, the child must cash out any remaining pension balance as a tax free lump sum by no later than age 25, unless they remain disabled.
