### Investment objective

To produce consistent absolute returns that are independent of overall movements in traditional stock and bond markets. The fund aims to provide a return greater than the Reserve Bank of Australia cash rate over rolling three-year periods after fees and taxes.

### Minimum suggested timeframe

At least 5 years

### Strategy

The option aims to maximise diversification by spreading risk evenly across three uncorrelated investment themes; Momentum, Carry and Value, with no single theme dominating the return profile. The strategy employs a quantitative process to determine a view of the opportunities across the three investment styles. By maintaining a comparatively small exposure to any individual contract, Aspect achieves sector and contract diversification, thereby exploiting a wide range of opportunities and maximising expected long-term risk-adjusted returns.

All returns are calculated on an annualised basis using exit price to exit price with distributions reinvested, net of management costs, transaction costs. All return calculations exclude any individual taxes payable by the investor and all other fees and rebates disclosed in the relevant product disclosure statements available on our website or by calling us. The 'distribution' component is the amount paid by the way of distribution, which may include net realised capital gains.

\*\* Portfolio risk is broken down by sector at each point in time based on the proportion of total undiversified value-at-risk from each sector; correlation effects are not taken into account.

\*\*\* The sector performance contribution displayed in this graph is intended to be indicative and give an estimate of winning and losing components of the Fund. It does not include management fees, cash and other expenses and as such, will not add up to the aggregate Fund performance. All performance figures contained in this document refer to the Aspect Diversified Futures Fund. This performance is based on information believed to be accurate. It has not been audited by a third party.

^ This estimated performance fee has been calculated on a per annum basis from the fund's inception (December 2017) to 29 February. Please refer to the PDS for the actual performance fee paid in the last 12 months to 29 February. As past performance is no indicator of future performance, the performance fee, if any, charged in the future may differ.

\* Calculated on the dollar value of positive performance (less carried forward negative performance) generated on the futures and forwards trading accounts.
