

Essential Super.

Diversified Index option fact sheet | 31 December 2023

Provided by

Investment objective

To provide a balance of income and capital growth over the medium-to-long term. To closely track the option's composite benchmark over rolling three-year periods before fees and taxes.

Investment strategy

To invest 50% in a diversified portfolio of assets expected to generate long-term capital growth such as shares, property and infrastructure. 50% of the portfolio is allocated to defensive assets such as fixed interest and cash to provide the portfolio with relatively stable returns. Allocations to asset classes will generally align to the benchmark but the option may adjust its exposure within the allocation ranges in response to changes in risk and return expectations.
