## Investment objective

To closely track the S&P/ASX 300 Accumulation Index with the aim of generating returns (before tax and fees and assuming income is reinvested) comparable to the Australian sharemarket as measured by that benchmark over rolling one-year periods.

## Investment strategy

Detailed risk analysis is used to design a portfolio of shares which provides the greatest likelihood of matching the performance of the S&P/ASX 300 Accumulation Index. All shares in this option are maintained within a very close margin to their weight in the Index. The option predominantly invests in Australian companies and therefore does not hedge currency risk.
