Past performance is not an indicator of future performance for this option or any other option available from Colonial First State.

Returns are calculated on a cumulative year-on-year basis which are then annualised. For funds that have been in existence for less than one year, the since inception performance is actual performance since inception and not annualised. Calculations are based on exit price to exit price with distributions reinvested, after ongoing fees and expenses but excluding individual tax, member fees and entry fees (if applicable). Please refer to the PDS for full details of the applicable fees, costs, and benchmarks.

Investment objective

The option will invest predominately (generally 92-98%) in an exchange-traded product (ETP). The selected ETP aims to track a broad index benchmark (S&P 500 Index) of shares listed on US stock exchanges (before taxes and fees). The option aims to closely track a Custom Benchmark (95% S&P 500 Index and 5% Reserve Bank of Australia Cash) before fees and taxes over rolling five year periods.

Investment strategy

The option will hold units in an ETP and cash and target 95% exposure to the underlying ETP and will generally have exposure to the ETP within ranges of 92-98%. CFS has selected the iShares® S&P 500 (ASX:IVV) ETP issued by BlackRock Inv Mgt (Aus) Ltd (BlackRock). BlackRock has adopted a passive investment strategy and aims to track the underlying index - the index is an established market cap weighted US equity index and is widely used to measure performance of large-cap equities listed on US stock exchanges. The ETF is not currency hedged.
